

IN THE CLAIMS:

1. (Canceled).
2. (Currently Amended): ~~The steering column cover according to claim 1, wherein said boss part comprises:~~  
A steering column cover for a vehicle having an upper column cover and a lower column cover comprising:  
a bolt inserting part formed in the upper column cover; and  
an impact absorption boss part protruding from the lower column cover and  
comprising:  
a bolt hole at a center of an upper surface of the boss part;  
notches formed on a circumference of the boss part at regular intervals; and  
support parts defined by said notches;  
wherein said bolt inserting part and said impact absorption boss part are securely  
coupled by means of a bolt.
3. (Original): The steering column cover according to claim 2, wherein the boss part further comprises a recess formed on the upper surface of the boss part so that the bolt inserting part of the upper column cover can be firmly engaged thereto.
4. (Original): The steering column cover according to claim 3, wherein a width of the notches can be adjusted in accordance with required impact strength.
5. (Canceled).
6. (Currently Amended): ~~The steering column cover according to claim 1,~~  
A steering column cover for a vehicle having an upper column cover and a lower column cover comprising:  
a bolt inserting part formed in the upper column cover; and  
an impact absorption boss part protruding from the lower column cover and  
comprising notches on a circumference of the boss part;  
wherein a width of the notches can be adjusted in accordance with required impact strength;  
wherein said bolt inserting part and said impact absorption boss part are securely  
coupled by means of a bolt.
